## PROFESSIONAL SUMMARY

Technology Solutions Architect and Technical Project Management professional with 25+ years of expertise spanning cloud technologies, data analytics, and data science across healthcare, financial services, manufacturing, and government sectors. PMP-experienced leader with proven success managing cross-functional teams through complete SDLC phases, from technology modernization to deployment across Azure, GCP, and AWS platforms. Combines deep technical capabilities in data engineering and predictive modeling with strategic business acumen to drive innovation and measurable performance improvements. Excels in remote and distributed team environments, delivering complex technical solutions that bridge technology and business strategy.

## SKILLS

### Project Management:

Agile/Scrum, Waterfall, Hybrid Methodologies, JIRA, Azure DevOps, Microsoft Project, Risk Management, Budgeting, Resource Management, Technology Modernization, Migration, and Integration

### Data & Analytics:

SQL, Python, Power BI, Tableau, Data Modeling, Statistical Analysis, Predictive Analytics, Data Tools

### Remote Collaboration:

MS Teams, Slack, Zoom, Confluence, Google Workspace, Remote Team Leadership

### Technical:

Cloud Platforms (AWS/Azure/GCP), Database Management, ETL Processes, Requirements Gathering

### Soft Skills:

Executive Communication, Stakeholder Management, Cross-functional Leadership, Problem-solving

## PROFESSIONAL EXPERIENCE

### WorldLink US, Remote — *Technical Project Manager | Data Solutions*

2024 - 2025

- Led Technical Project Manager coordinating multiple products and managing development teams for Fortune 50 financial services client
- Directed cross-functional product development managers and technical teams to deliver enterprise-level data solutions

- Established project standards and governance frameworks for complex financial technology implementations
- Coordinated stakeholder communication and project deliverables across distributed teams and multiple time zones
- Managed technology alignment with business objectives for large-scale financial data processing initiatives

**CGI Technologies and Solutions, Remote/Various Locations — *Technical Project Manager | Data Solutions***

*2020 - 2024*

- Served in multiple leadership roles: Client Engagement Manager, Solutions Architect, Technical Project Manager, and Data Analytics Leader across diverse industries
- Generated \$40M+ in revenue through three successful client engagements by establishing new project standards and fostering productive client relationships
- Led technology modernization, migration, and integration strategies on MS Azure and GCP cloud platforms for government and private sector clients
- Managed complex cross-functional teams to re-engineer applications leveraging cloud infrastructure, including containerization with Docker/Kubernetes, data warehousing, and automated testing
- Earned three company awards: "Impact Award" for driving transformation in challenging public sector environment, "Spotlight Award" for program delivery excellence, and "Lonestar Award" for operational integrity

**Precision Strategic Partners (PSP), Various Locations — *Technical Project Manager | Data Solutions & Analytics***

*2005 - 2021*

- Planned and managed \$10M to \$75M projects with teams of 20-50+ members across government, healthcare, financial services, manufacturing, and entertainment sectors
- Served as Virtual CIO for multiple companies, reducing IT costs by 45% within 9 months while increasing revenue by \$23M+ over 3 years through strategic system modernization
- Architected proprietary cloud-based SaaS market intelligence platform generating \$3.5M+ annual revenue with enterprise subscriptions ranging \$12K-\$15K monthly
- Utilized advanced data analytics to identify 1,500+ franchise locations generating \$900M+ in annual systemwide revenue through strategic market analysis
- Facilitated investment fund raising totaling \$2.7+ billion across multiple industries through data-driven insights and market intelligence

- Implemented Agile/Waterfall methodologies using Scrum, Kanban, and Scrumban frameworks across AWS, GCP, and Azure platforms

## PROJECTS & ACHIEVEMENTS

- **Proprietary SaaS Market Intelligence Platform:** Architected and developed cloud-based application integrating multiple data sources (medical, retail, consumer, demographic, psychographics) generating \$3.5M+ annual revenue with \$12K-\$15K monthly subscriptions from investment and real estate groups
- **Fortune 50 Financial Technology Modernization:** Led cross-functional teams through cloud migration and application re-engineering on Azure/GCP, resulting in improved efficiency and enhanced operational security
- **Virtual CIO Strategic Transformation:** Reduced client IT costs by 45% within 9 months while increasing revenue by \$23M+ over 3 years through legacy system consolidation and modernization
- **Multi-Industry Franchise Growth Initiative:** Utilized data analytics to identify 1,500+ franchise locations generating \$900M+ in annual systemwide revenue through strategic market analysis and customer profiling
- **Investment Fund Analytics Program:** Leveraged proprietary data insights to facilitate raising \$2.7+ billion in equity investments across multiple industries
- **Public Sector Digital Transformation:** Delivered complex government modernization project earning CGI "Impact Award" for driving positive transformation in challenging client environment

## EDUCATION & CERTIFICATIONS

**Master of Science (MS)** — Management Information Systems & Quantitative Data Sciences, Texas Tech University  
(*Magna Cum Laude Honors Graduate*)

**Bachelor of Business (BBA)** — Management Information Systems & Quantitative Data Sciences, Texas Tech University  
(*Cum Laude Honors Graduate*)

## RELEVANT EXPERIENCE & TRAINING:

- Project Management Professional (PMP) experience and methodologies
- Agile Scrum Mastery and advanced project management frameworks

- AWS Certified Solutions Architect and Cloud Practitioner
- Google Certified Cloud Architect and BigQuery implementation specialist
- Azure Architect Design, DevOps Solutions, AI Fundamentals, and Data Factory
- Google Data Analytics Professional certification
- Snowflake Data Platform Practitioner and Advanced Analytics
- Databricks Lakehouse Fundamentals
- AI/ML Design & Implementation, Generative AI for Project Managers
- Advanced database development and data engineering methodologies
